For Oral Inhalation Only
Do not spray COMBIVENT RESPIMAT into your eyes.

For complete instructions, you should read the Instructions for Use enclosed with your prescription before you start using COMBIVENT RESPIMAT and each time you get a refill.

Please refer to the pictures on this page to become familiar with the components of your COMBIVENT RESPIMAT Inhaler. The following instructions show you how to prepare for first-time use, and how to use the COMBIVENT RESPIMAT Inhaler for daily dosing.

---

**ABBREVIATED INSTRUCTIONS FOR USE**

**PREPARE FOR FIRST-TIME USE**

1. With the orange cap closed, press the safety catch while pulling off the clear base. Be careful not to touch the piercing element located inside the bottom of the clear base.

2. Write the discard by date on the label of the inhaler. The discard by date is 3 months from the date the cartridge is inserted.

3. Take the cartridge out of the box. Push the narrow end of the cartridge into the COMBIVENT RESPIMAT Inhaler. The base of the cartridge will not sit flush with the COMBIVENT RESPIMAT Inhaler. About 1/8 of an inch will remain visible when the cartridge is correctly inserted.

4. Put the clear base back into place. Do not remove the clear base again. Your COMBIVENT RESPIMAT Inhaler should not be taken apart after you have inserted the cartridge and put the clear base back.

---

**PRIME FOR FIRST-TIME USE**

The following steps are needed to fill the dosing system the first time you use it, and will not affect the number of doses available.

Proper priming of the COMBIVENT RESPIMAT Inhaler is important to make sure the correct amount of medicine is delivered.

5. Hold the COMBIVENT RESPIMAT Inhaler upright with the orange cap closed, to avoid accidental release of the dose. Turn the clear base in the direction of the white arrows on the label until it clicks (half a turn).

6. Flip the orange cap until it snaps fully open.

7. Point the COMBIVENT RESPIMAT Inhaler toward the ground. Press the dose-release button. Close the orange cap. Repeat steps 5, 6, and 7 until a spray is visible.

---

**DAILY DOSING**

A. Hold the COMBIVENT RESPIMAT Inhaler upright with the orange cap closed to avoid accidental release of a dose.

TURN the clear base in the direction of the white arrows on the label until it clicks (half a turn).

B. Flip the orange cap until it snaps fully OPEN.

Breath out slowly and fully, and then close your lips around the end of the mouthpiece without covering the air vents.

Point your COMBIVENT RESPIMAT Inhaler to the back of your throat.

While taking in a slow, deep breath through your mouth, PRESS the dose-release button and continue to breathe in slowly for as long as you can.

Hold your breath for 10 seconds or for as long as comfortable.

Close the orange cap until you use your COMBIVENT RESPIMAT Inhaler again.

---

A helpful way to recall the steps for Daily Dosing is to remember TOP:

Turn the clear base
Open the cap and close your lips around the mouthpiece
Press the dose-release button and inhale

If your COMBIVENT RESPIMAT Inhaler has not been used for more than 3 days, release 1 puff toward the ground to prepare the COMBIVENT RESPIMAT Inhaler for use.

If your COMBIVENT RESPIMAT Inhaler has not been used for more than 21 days, repeat steps 5, 6, and 7 until a spray is visible. Then repeat steps 5, 6, and 7 three more times to prepare the COMBIVENT RESPIMAT Inhaler for use.

CARE OF
COMBIVENT®
(respirator and albuterol)
INHALATION SPRAY
THE POWER OF 2

How should I care for my COMBIVENT RESPIMAT Inhaler?
Clean the mouthpiece, including the metal part inside the mouthpiece, with a damp cloth or tissue only, at least once a week. Any minor discoloration in the mouthpiece does not affect your COMBIVENT RESPIMAT Inhaler.

How should I store my COMBIVENT RESPIMAT Inhaler?
- Store COMBIVENT RESPIMAT Inhaler at room temperature, from 59°F to 86°F (15°C to 30°C)
- Do not freeze your COMBIVENT RESPIMAT Inhaler and cartridge
- Keep your COMBIVENT RESPIMAT Inhaler and cartridge out of the reach of children

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.

Dizziness and blurred vision may occur with COMBIVENT RESPIMAT. Should you experience these symptoms, use caution when engaging in activities such as driving a car or operating appliances or other machines.

Do not use COMBIVENT RESPIMAT more often than your doctor has directed. Deaths have been reported with similar inhaled medicines in asthma patients who use the medicine too much. Seek immediate medical attention if your treatment with COMBIVENT RESPIMAT becomes less effective for symptomatic relief, your symptoms become worse, and/or you need to use the product more frequently than usual. Allergic reactions may occur, including itching, swelling of the face, lips, tongue, or throat (involving difficulty in breathing or swallowing), rash, hives, bronchospasm (airway narrowing), or anaphylaxis. Some of these may be serious. If you experience any of these symptoms, stop taking COMBIVENT RESPIMAT at once and call your doctor or get emergency help.

What should I tell my doctor before taking COMBIVENT RESPIMAT?
Tell your doctor about all your medical conditions, especially if you have narrow-angle glaucoma, prostate or urinary problems, a history of heart conditions (such as irregular heartbeat, high blood pressure), seizures, thyroid disorder, diabetes, low potassium levels, or kidney or liver disease. Also tell your doctor if you are pregnant or nursing.

Tell your doctor about all medicines you are taking, especially heart medications or drugs to treat depression.

What are the most common side effects of COMBIVENT RESPIMAT?
The most common side effects reported with use of COMBIVENT RESPIMAT include infection of the mouth and throat, and potential cost savings.

Dizziness and blurred vision may occur with COMBIVENT RESPIMAT. Should you experience these symptoms, use caution when engaging in activities such as driving a car or operating appliances or other machines.
